SUMMARY

CS student at Shiv Nadar University Chennai specialized in DevOps, cloud infrastructure, and embedded systems. Built and maintain a self-hosted home server running 15+ services on a headless PC, accessible over HTTPS with zero open ports. Hands-on with Docker, Cloudflare Tunnel, Linux, and AWS.

TECHNICAL SKILLS

Languages

Python, JavaScript, TypeScript, C, SQL, HTML/CSS

Networking

Packet Sniffing (Scapy), Pi-hole DNS, MQTT, Network Traffic Analysis, Wireshark

Tools & Workflow

Git, GitHub, Bash Scripting, Linux System Administration

DevOps / Infra

Docker, Proxmox VE, LXC Containers, Nginx Reverse Proxy, Cloudflare Tunnel, Linux

Web & Backend

Flask, Node.js, React, MongoDB, MySQL, REST APIs

Exploring

Kubernetes (K3s), Terraform, Prometheus, Grafana, GitHub Actions

PROJECTS

Home Lab & Private Cloud Infrastructure

- Architected and self-hosted 15+ services on a Mini PC running Ubuntu Server 24/7, managed via Docker Compose.
- Engineered zero-trust HTTPS exposure via Cloudflare Tunnel with zero open inbound ports — hands-on experience with secure tunnelling outside a cloud environment.
- Maintained uptime through automated container updates, self-hosted push notifications, and a Postfix mail server for failure alerts.

Wi-Fi Management System

- Developed a 3-tier network monitoring platform using Scapy for real-time packet capture and per-device bandwidth analysis across a LAN.
- Engineered a Flask REST backend with MySQL to aggregate upload/download metrics; delivered a live Chart.js dashboard with automated daemon lifecycle management via Bash on Ubuntu Server.

Fleet-Sync IoT Real-Time Tracking System

- Designed and implemented an MQTT publish-subscribe telemetry pipeline for low-latency GPS data transmission between C-based embedded firmware and a cloud monitoring station.
- Optimised geospatial data ingestion to handle high-frequency device updates, collaborating across hardware and software layers to ensure smooth real-time dashboard visualisation.

careerDrive

- Developed and containerised a full-stack portfolio builder with authentication and dynamic milestone tracking; independently led the project from design to Docker deployment.

EDUCATION

08/2024 – Present

B.Tech, Computer Science & Engineering

Shiv Nadar University Chennai

CGPA: 8.9 /10.0 (up to 3rd Semester)

ACHIEVEMENTS

Activities

Participated in the 2nd Digital India RISC-V Symposium 2025 at IIT Madras Research Park — a national symposium on RISC-V architecture, semiconductor innovation, and India's chip ecosystem.

Personal Infrastructure

Designed and deployed a private cloud with Proxmox VE, Docker services, and Cloudflare Tunnel — demonstrating production-grade systems engineering beyond academics.
